

SECURITY WITHOUT REBOOTS

Provides live, automated kernel patching without reboots

Delivers the latest security and stability upgrades

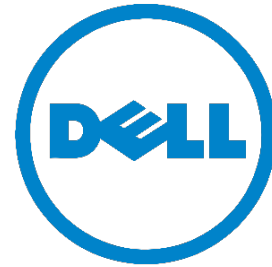

Takes minutes to install

KernelCare is a new great service, which provides important updates for the running kernel

- Founded in 2009
- Headquartered in Palo Alto, CA
- Stable, profitable, privately funded
- Staff of 130+
- Expertise in the Linux hosting and datacenter market and with technical depth in hosting, kernel development and open source

200,000+ installs | 4 000+ Partners | Unlimited Support

- Linux kernel needs to be updated every one or two months with security fixes
- The process requires reboot
- Each reboot requires:
 - System downtime
 - Manual work for system administrators
 - Delayed updates and vulnerable systems

KernelCare solves these issues by delivering security updates to the kernel without the need to reboot

Distributions

- CentOS 5, 6, 7
- RHEL 5, 6, 7
- CentOS 7 Plus
- Xen4CentoS 6, 7
- CloudLinux 5, 6, 7
- Proxmox VE 2.6, 3.10, 4.4
- Ubuntu LTS 14.04, 16.04
- Virtuozzo/OpenVZ 2.6.32
- Debian 6, 7, 8

Virtualization

- Xen, KVM, PSBM - host, vm
- vmware, virtualbox – vm
- Microsoft Hyper-V
- OpenVZ, Virtuozzo, LXC - host only (single kernel, no need for patches inside containers)

- Security issue identified
- Kernel team prepares a patch
- Patch is compiled into binary form
- Patch is deployed to server
- Client software checks for updates on the server
- Patch is downloaded, and applied to the kernel

END RESULT: SAFE KERNEL

- Buy a license
- Install RPM
- Done

END RESULT: SAFE KERNEL

- Automatic updates
- ksplice migration
- Nagios & Zabbix integration
- Install & Forget

END RESULT: SAFE KERNEL

No performance impact

Prompt patches rollout

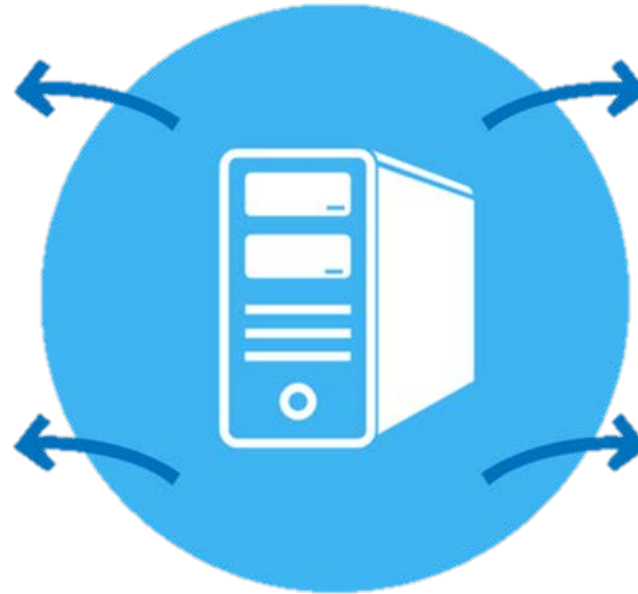

Ability to roll back changes

Minutes to setup

Save time, updates are automated

Avoid downtime

Prevent security incidents

Decrease support costs

Saves ~ 30 minutes per server and corresponding cost savings
for administrators

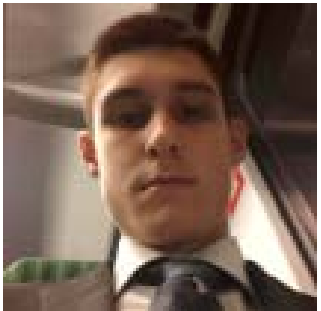

Frank Doud
G.C. Solutions
Owner

"Very cost effective product. Works seamlessly along all of our servers. Quickest turnaround for security patches I have ever seen.

Outstanding product and service. Plug and Play.

This protect is #1 at protecting your servers kernel. I have checked off another box for server security. **Thanks KernelCare!**"

Michael Dance
Licensecart
Chief Executive

"KernelCare saves us time worrying about security updates and losing uptime because of reboots which is crucial to any business.

KernelCare also has amazing fast support which are always there when you need them but you'd hardly need it:).

I don't know where we would be without it."
